APRIL 1, 1996

This is to certify that Magnetizer Water Conditioner ( Model - MIC ) supplied by M/S. Reliance Compressed Air Engineers, Secunderabad, was installed in our plant at inlet of water line for cooling system to Ingersoll-Rand air compressor on 29-12-1996. Before installation of this water conditioner in line, scale formation used to take place and waterline was getting choked almost once in a month. These scales used to be removed by using descaling compound and lot of money was spent on this activity.

After installation of this magnetizer, till date water line is not choked and water flow is consistence. Hence we confirm that magnetizer water conditioner is working satisfactory.
